Prosecuting Attorney Cloud, who had been ordered here by the governor from Beaton to atop the contest, returned yesterday after having satisfied himself that it would not take piace. The sherilf falled to put in an appearant until the right was over. He was busy at the telegraph office answering messages from the governor during the progress of the contest. The governowired him that he had been informed it would take place today in disregard of his instructions, and if in his the sheriff's) ludgment it was a prize fight, he should stop it at all hazards and arrest all interested parties. As yet matrests have been made and none are likely to be made, Governor Jones wired the officials of the Hot Springs railroad to hold the train, so that he could reach the city on a special train, but his instructions were either ignored or miscarried, and he did not get here.

DISTRESS IN SPAIN. This Occupies Public Attention More Than War.

London, March 5.—The Madrid correspondent of the Daily Mail says:
In contrast with the clamor in America, there is almost absolute caim here and that, too, even on the bourses, where the falls are due to foreign selling. The general opinion is that the United States dare not make a suspicton, which is unsurported by evidence and is absorred by European opinion, the pretext for war.

The distress in various parts of the country occupies the public mind far more than American relations. Notwithstanding the reduction in the grain duty, a famine threatens.

The socialists are utilizing the dearth, under guise of electionering, as a means of fomenting popular agitation, and it would require some overtact of injustice on the part of America to divert public sentiment.

BRADSTREETS' REVIEW.

All Signs Point to Unprecedented Volume of Business. New York, March 4.-Bradstreets to-

New York March 4—Bradstreets to morrow will say:

Nearly all signs point to an unprecedented volume of business being done or arranging for at the present time. The aggressive strength of prices, record-breaking bank clearings, and continued large exports, particularly of the lower priced cereals, a very heavy volume of business in Iron and steel and kindred lines, and generally satisfactory rejects as to the volume of spring trade at leading distributive centers, are among the visible features of this week's trade development. Nearly all of the country's cereal products are higher in prices this week, and also some varieties of provisions. Bessemer pig iron, copper, raw couton and tin.

The further advance in pig iron this week would seem to indicate that the numense current production is yet without visible effect on values.
